

CAI BIRCH

Java Developer / System Developer

Stockholm, Sweden • 0761859527 • caiowain@gmail.com

PROFESSIONAL SUMMARY

System developer graduate focused on Java development, test automation and reliable backend systems. Hands-on experience with Java/Kotlin, Spring Boot, REST APIs, SQL/PostgreSQL, Git, JUnit/Mockito, Docker and Kubernetes. Strong foundation in object-oriented programming, debugging, secure development and writing maintainable code. Experienced in agile teams building cloud-based microservices, healthcare-data workflows and real-time communication features. Analytical and collaborative problem-solver seeking a Java Developer role where I can contribute to internal tools, automated test processes and high-quality software in complex technical environments.

TECHNICAL SKILLS

Programming languages:	Java, Kotlin, JavaScript, TypeScript, C#, SQL
Java & backend:	Java/OOP, Spring Boot (v2/v3), REST APIs, Hibernate/JPA, microservices, JSON, XML
Testing & quality:	Unit testing, JUnit, Mockito, debugging, code reviews, secure development, test automation fundamentals
Data & systems:	PostgreSQL, SQL, database management, system architecture, WebRTC, real-time application flows
Frontend & web:	Vue.js, React Native, Expo, HTML, CSS
DevOps & tools:	Git, GitHub, Docker, Kubernetes, JIRA, CI/CD concepts, agile ways of working
Languages:	Fluent Swedish and English

PROFESSIONAL EXPERIENCE

Software Developer (Intern) | Braive AB

Stockholm, Sweden | 2026

- Developed and tested Java/Kotlin Spring Boot microservices and Vue.js admin interfaces in an agile team using Git, JIRA and code review practices.
- Improved reliability of backend logging flows by debugging race conditions, reducing downtime and strengthening data integrity.
- Optimised PostgreSQL and Hibernate/JPA handling for sensitive healthcare data, applying secure-development principles and reducing manual error sources.
- Containerised services with Docker and participated in Kubernetes-based DevOps workflows, supporting consistent environments and faster feedback loops.

Software Developer (Intern) | Omika Health AB

Stockholm, Sweden | 2025

- Designed and implemented a production-ready P2P video chat feature with WebRTC in React Native, including a lightweight signalling server and secure authentication.
- Built, tested and debugged real-time application flows, validating complex interactions with sub-millisecond response times in proof-of-concept tests.
- Translated user needs into practical technical solutions while collaborating closely with a small agile product team.

Correctional Officer (hourly and summer substitute) | Kriminalvården

Sweden | Ongoing

- Work close to core operations in a high-trust environment with strict requirements for security, confidentiality and sound judgement.
- Contribute in a setting where collaboration, accountability and clear communication are essential.
- Bring an operational perspective into software development by connecting technical solutions to real user needs and safety requirements.

Laboratory Teacher | Loughborough University

Loughborough, United Kingdom | 2018-2021

- Led advanced teaching in biomechanics and motor control for more than 100 undergraduate and master's students, using Matlab and OpenSim data collection protocols.
- Coached colleagues in interdisciplinary teams and demonstrated knowledge-sharing, mentoring and collaborative problem-solving.

Research Assistant | GIH / KTH

Stockholm, Sweden | 2017

- Analysed biomechanical data with quantitative modelling to identify patterns of muscle spasticity in stroke patients.
- Applied analytical problem-solving and data interpretation in a research environment involving complex human movement data.

EDUCATION

Diploma, Software Development - YH Akademin, Sundsvall

Focus on database management, system architecture and scalable backend solutions using Spring Boot in team settings. Practical training in Java/OOP, SQL, testing, Git, agile development and maintainable software design.

Neuroscience (research) - Lund University, Lund

M.Sc. Sport Science - GIH, Stockholm

B.Sc. Sport Science - Bangor University, United Kingdom

Associate Fellow of Teaching - Loughborough University, United Kingdom

ADDITIONAL

- Career focus - Java developer roles involving internal tools, test automation, backend services, integrations, secure systems or complex technical platforms.
- 3rd place, Innovation Pioneers Hackathon 2025 - Prototyped an AI-driven collaboration app connecting entrepreneurs with key stakeholders; reached the top 3 in a competition with innovation experts.
- JFokus 2026 - Attended one of Europe's leading developer conferences, with focus on modern Java architectures, tools and security trends.
- Independent project - Developing a machine-learning tool to analyse kinematic data and identify risk factors for musculoskeletal injuries.
